

Mubarak Mustapha [Data Analyst]

Calgary, AB | [LinkedIn](#) | 403.561.9076 | mubarak.mustapha@outlook.com

SUMMARY

Detail-oriented Data Analyst with a Google Data Analytics Certification and a strong foundation in statistical analysis, data visualization, and predictive analytics. Skilled in developing data-driven strategies and creating impactful visualizations to inform decision-making. Committed to continuous learning and process optimization, focusing on leveraging data to drive business improvements and operational efficiency. Skills include:

- **Languages:** Python, SQL.
- **Visualization:** Matplotlib, Seaborn, Plotly, Tableau, Power BI.
- **Analysis Tools:** Pandas, Numpy, DAX, Power Query, Excel.

WORK EXPERIENCE

Data Analyst, TELUS International, Canada

April 2024 - Present

- Conduct thorough research and cross-reference data from diverse sources, including web, text, audio, and image data, improving model accuracy and user intent alignment.
- Evaluate the quality of AI-generated responses, following strict project guidelines, ensuring 100% compliance and consistently high-quality deliverables.

Data Analyst, Energi Simulation Centre for Geothermal Systems, Canada

November 2022 - December 2023

- Contributed to developing a data-driven dashboard for geothermal rig data, enhancing data interpretation and reducing data processing time through automated data upload and analysis.
- Led integration of an 85%-accurate machine learning model (Python) into the dashboard, improving rig parameter predictions, and showcasing advanced proficiency in predictive analytics.
- Fine-tuned Python model (random forest) by adjusting the target parameter dynamically, increasing model versatility.
- Worked closely with project stakeholders (engineers and researchers) throughout the project to ensure that the dashboard met their needs demonstrating strong communication skills.

PROJECT EXPERIENCE

Drilling Parameter Predictor, Research Project

- Enhanced a Python model (random forest) for predicting drilling parameters by adjusting the target parameter dynamically, increasing model versatility and achieving 85% accuracy, which improved predictive capability.
- Collaborated closely with researchers to refine and validate the model's performance across diverse datasets and varying parameters.

Adventure Works Report, *Business Intelligence Project*

[View](#)

- Leveraged Power Query to execute an ETL (Extract, Transform, Load) process on raw data, ensuring high data quality and consistency, which resulted in a 95% reduction in data errors.
- Established a robust data model enabling efficient and accurate data analysis.
- Developed calculated columns using Power BI (DAX), enriching the dataset with actionable insights.
- Prepared a report with charts to visualize key performance indicators (KPIs) and other critical metrics.

EDUCATION

Master of Engineering, University of Calgary, Canada

April 2024

- Relevant Coursework: Applied Machine Learning and Predictive Analytics

Bachelor of Engineering, Kwara State University, Nigeria

December 2020

PROFESSIONAL DEVELOPMENT AND CERTIFICATIONS

- [Google Data Analytics Professional Certificate](#)
- [Microsoft Power BI for Business Intelligence](#)

INTERESTS

- Badminton, Ice Skating, Active Living, Photography
