PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science graduate with proficiency in Python, R, and statistical analysis. Skilled in data wrangling, visualization, and applying machine learning techniques to solve real-world problems. Experienced in working with diverse datasets and developing insights through exploratory data analysis and predictive modeling. Eager to contribute as a Data Science Intern, applying technical expertise, problem-solving abilities, and a growth mindset to support data-driven decision-making while gaining hands-on industry experience.

WORK EXPERIENCE

Siwes Intern

Sep 2024 – Feb 2025

NITDA

Nigeria

- Built a simple linear regression model to predict student performance
- Feature engineered a new column 'Gender' and randomly split and shuffled across all entries in the dataset
- Performed analysis on the new gender column to check which gender averagely performs best
- performed multivariate analysis to check if the hours studied affects the exam score based on the attendance percentage
- Built the linear regression model on the target column (Exam Score) and feature column (Hours Studied)
- Evaluated the model using mean absolute error: 3.83, mean squared error: 19.16 and r^2_{score} : 0.64 respectively

EDUCATION

Bachelor of Science Computer Science

Sep 2022 - Sep 2025

Kwara State University, Malete

Nigeria

TECHNICAL SKILLS

Data Analysis and Visualization Tools: Python (Pandas, NumPy, matplotlib, seaborn, plotly ,scikitlearn), R (tidyverse, caTools, ggplot2) .

Project and Process Support: Microsoft Office, Teams, Outlook.
